## **Jackson County Community Justice Juvenile Division**

## **Detention Facility Twelve Year Data Trend Reports**

## SUMMARY

Information on Jackson County juvenile offenders was collected, entered and maintained in the Juvenile Justice Information System (JJIS). JJIS is a state-wide electronic case management system used by all counties in the state of Oregon and maintained by the Oregon Youth Authority.

### **Items to consider when reviewing data:**

Small changes in raw numbers between years may create large percentages. For example, a change from 6 to 2 creates a change of 67%. Review both the raw numbers and percentages to determine the significant of these changes.

### **SUMMARY**

Total detention admissions decreased 16% from the previous year, with the entire decrease being male youth.

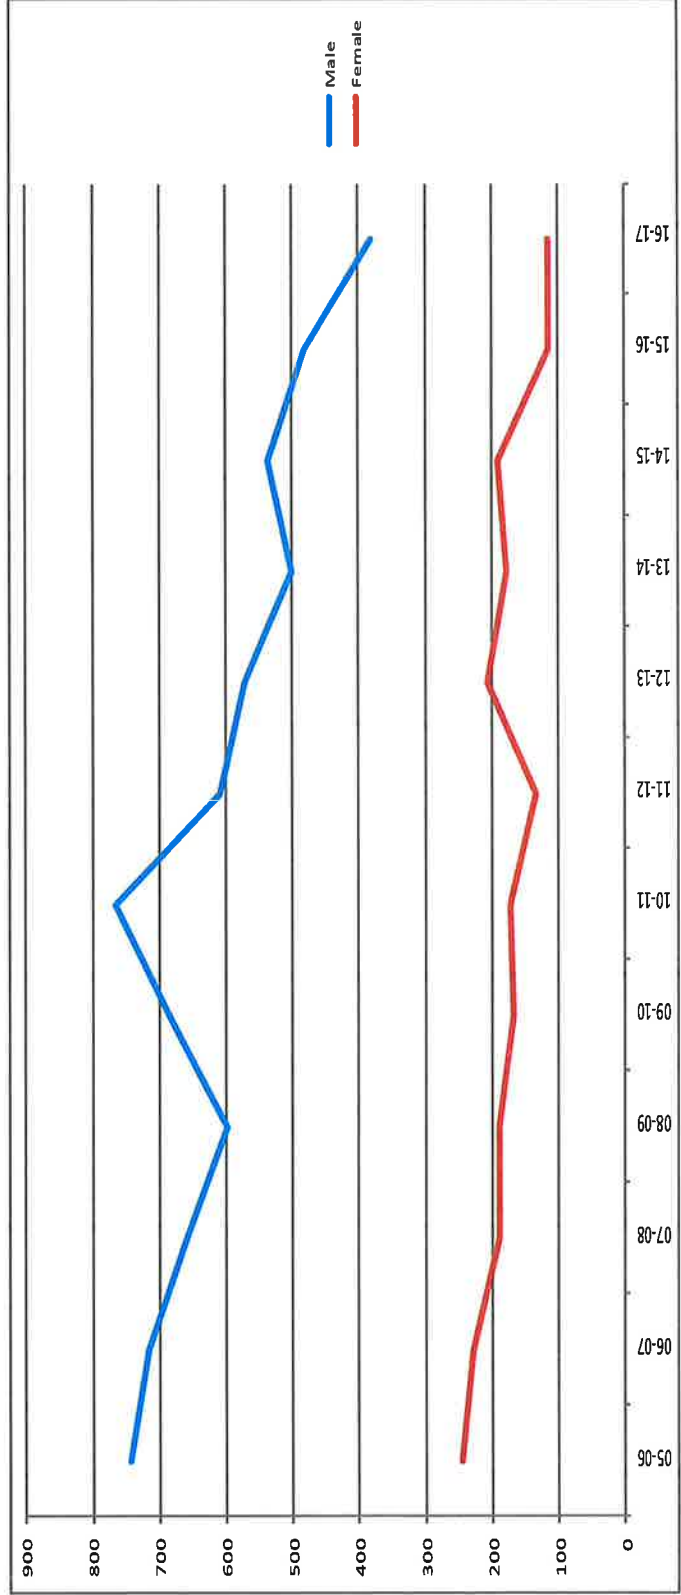

Ages 16 to 17 continue to be the highest number and percentage of youth admitted to the detention facility. 76% of admissions to the detention facility over the last twelve years are male youth, with last year being 70%. White youth (76%) followed by Hispanic youth (18%) are the largest admissions by race. Probation violations (39%) are the largest admission reason for placement in detention, followed by new law violations (23%), Warrants (17%), Court Order Sanction (12%) and Violations of Conditional Release (9%).

The average daily population in detention has averaged 20 youth over the last six years. Over the last 4 years this has dropped to 19. The average length of stay is approximately 12 days, which is the highest in 6 years, but also correlates with the lower average daily population.

Approximately 31% of youth entered detention only one time over the last 12 years. 21% of youth over the last year only entered detention one time, this would correlate with the highest admission reason being for probation violations.
