SUMMARY

Information on Jackson County juvenile offenders was collected, entered and maintained in the Juvenile Justice Information System (JJIS). JJIS is a state-wide electronic case management system used by all counties in the state of Oregon and maintained by the Oregon Youth Authority.

Items to consider when reviewing data:

Small changes in raw numbers between years may create large percentages. For example, a change from 6 to 2 creates a change of 67%. Review both the raw numbers and percentages to determine the significance of these changes. Data in this report represents crimes that have a corresponding referral to the Community Justice Juvenile Division Services which is the juvenile justice provider in the county.

If a juvenile crime occurred that was not reported, or law enforcement did not create a referral regarding the crime, it is not included in this data.

SUMMARY

The most common or serious offense referrals have continued to see a downward trend over the last 12 months (9%) and the last 12 years (67%). Over the last 12 months, five offenses showed an increase over the previous year: Disorderly Conduct 16% (16 youth), Burglary 1 12% (2 youth), Burglary 2 63% (10 youth), criminal mischief 2 34% (17 youth), Arson 2 200% (2 youth), unauthorized use of a motor vehicle 31% (4 youth) and misdemeanor drug offenses 58% (12 youth).

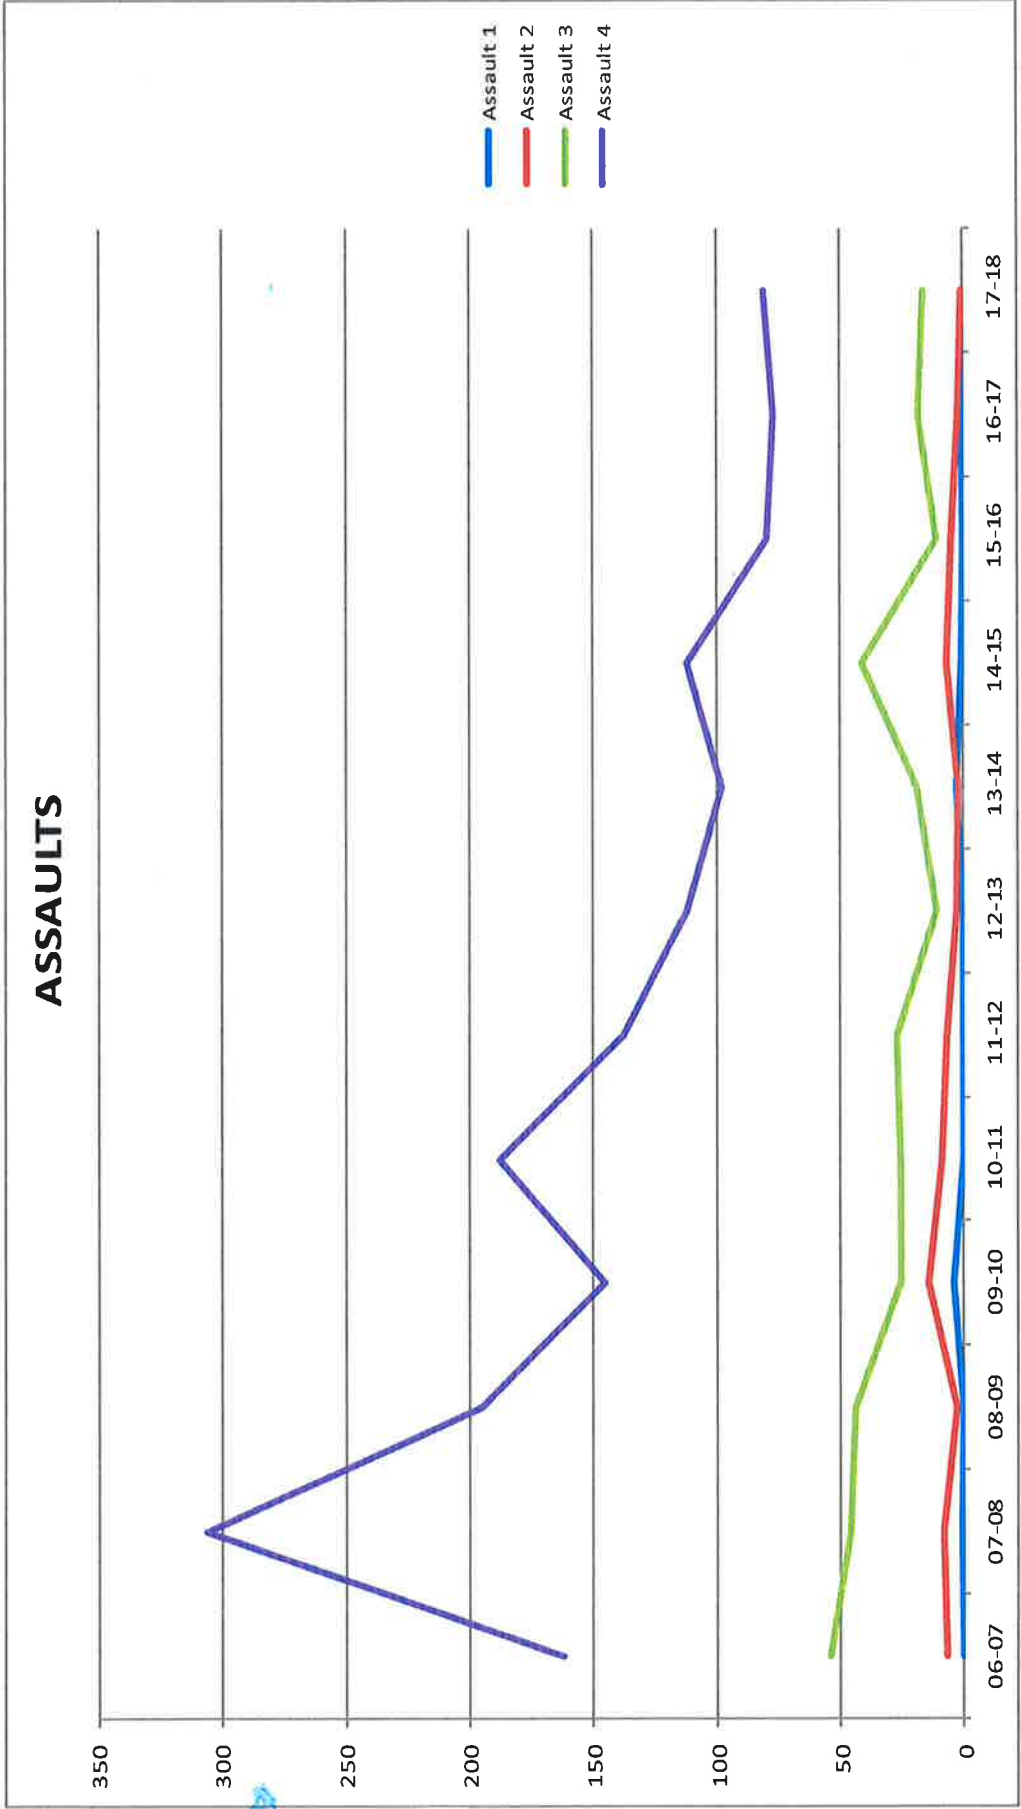

The most common or serious person-to-person offense referrals remained constant over the previous year with only a reduction of 1 youth referral. This is the first year in 12 years that there has not been a large decrease. Over the past twelve years that has been a 50% reduction in youth referrals.

Although there were several offenses that showed an increase, the most common or serious property offense referrals have shown a 18% reduction from the previous year and 75% over 12 years.

Misdemeanor and Felony drug referrals have steadily declined over the last 12 years (45%). Minor in possession of marijuana shows a decline of 18% from the previous year, which is the second year in a row that has shown a decline. Alcohol referrals show a 1 youth referral decline and a 85% decrease over the last 12 years.
