

JACKSON COUNTY

Community Justice

Jackson County Community Justice Juvenile Division

Total Referral and Youth Twelve Year Data Trend Reports

Summary

Information on Jackson County juvenile offenders was collected, entered and maintained in the Juvenile Justice Information System (JJIS). JJIS is a state-wide electronic case management system used by all counties in the state of Oregon and maintained by the Oregon Youth Authority.

Statistical information for this this past year may not represent accurate historical data due to the COVID-19 epidemic as police reports/referrals and overall service delivery was reduced dramatically or eliminated during this period of time.

Items to consider when reviewing data:

Small changes in raw numbers between years may create large percentages. For example, a change from 6 to 2 creates a change of 67%. Review both the raw numbers and percentages to determine the significant of these changes. Data in this report represents crimes that have a corresponding referral to the Community Justice Juvenile Division Services which is the juvenile justice provider in the county.

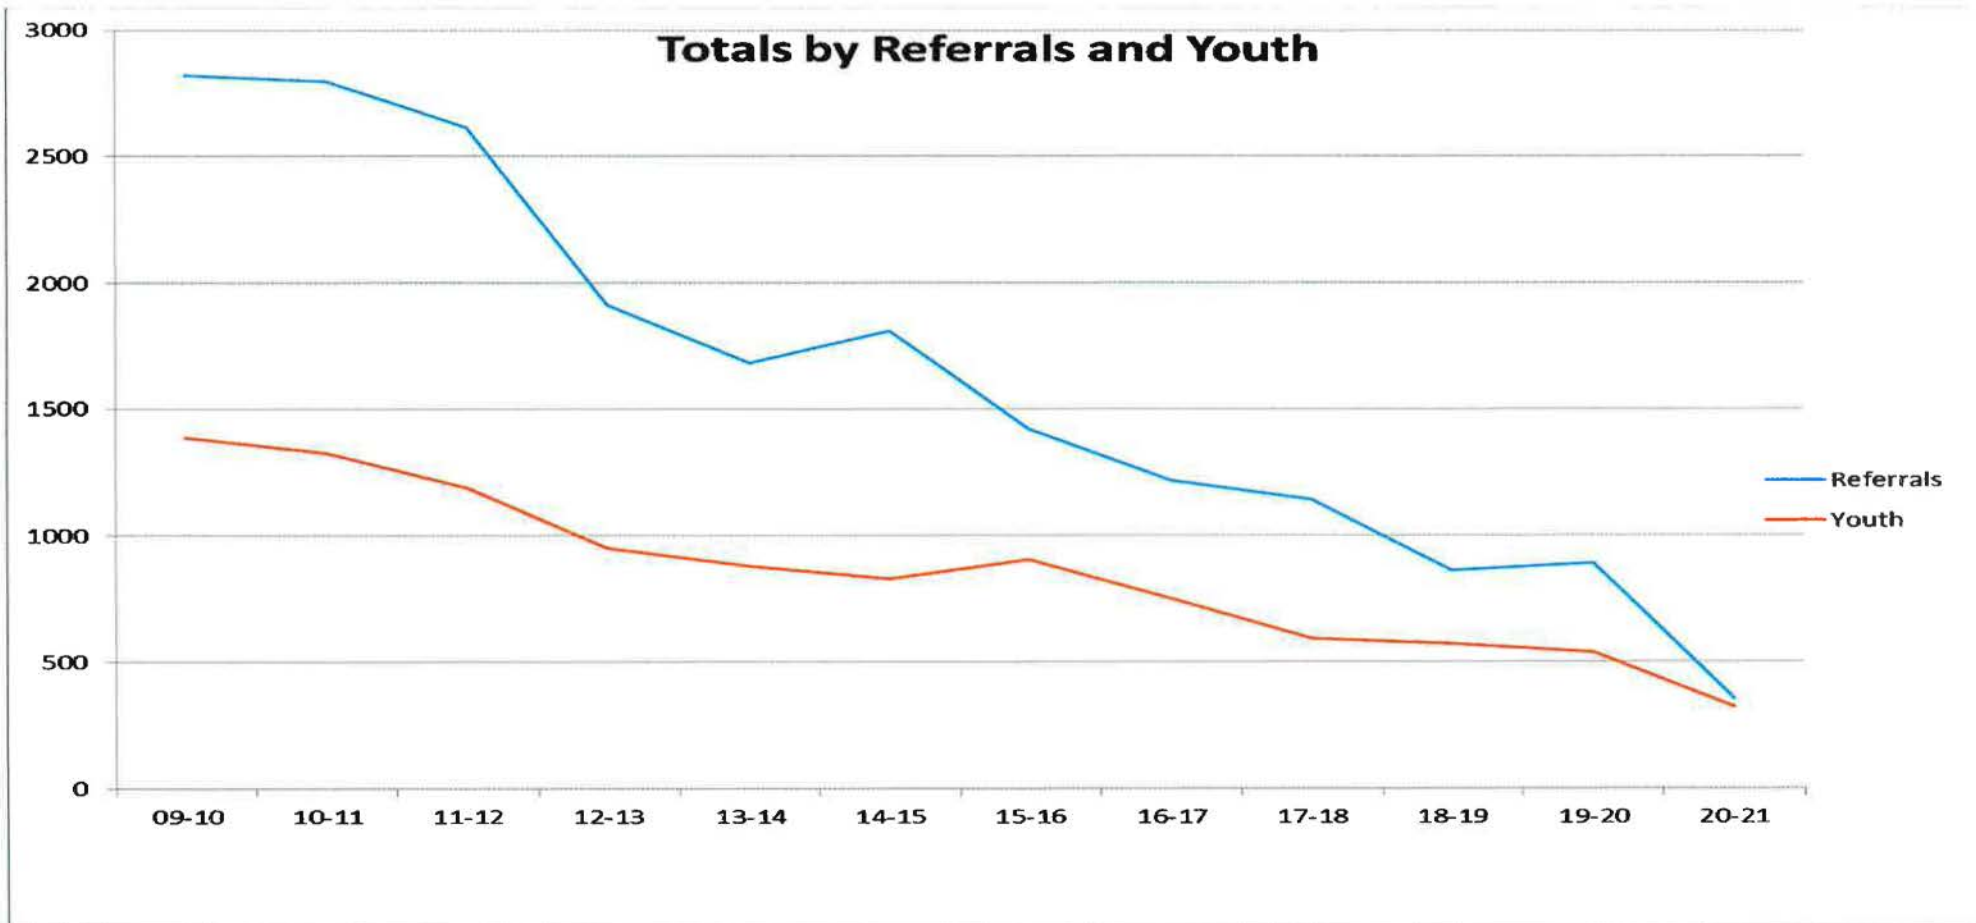

If a juvenile crime occurred that was not reported, or law enforcement did not create a referral regarding the crime, it is not included in this data.

SUMMARY

This past year showed a drastic decline in the total number of referrals (police reports) and youth referred to the juvenile division believe to have been caused by the COVID-19 pandemic. After seeing a slight increase the previous year of 3%, this past year showed a 60% reduction in referrals and 40% reduction in youth referred. Trends will need to continue to be monitored to determine if this was due solely to the COVID-19 pandemic or a continued reduction in youth crime. The total number of referrals by gender continues to narrow and over the last year 66% of referrals were male and 32% were female. Over the last 12 years, youth 12 years of age and under have shown a reduction of 70%, youth 13-15 years of age 75% reduction, and youth 16 and older 76% reduction, again the last year showing the greatest reduction. All races showed a reduction, with Native American youth showing the smallest at 11% (1 youth) and Hispanic youth showing the largest at 55% (58 youth). There was a 40% increase (6 youth) for youth categorized as other race.
