

TABLE "C"

DRAINAGE FACILITY	ROAD STANDARD	
	Collector, Arterial, Local "C"	Local "A" and "B"
Bridges*	50-year flood or the largest flood of record	25-year flood or the largest flood of record
Culverts*	50-year flood or the largest flood of record	25-year flood
Depressed Roadways	50-year flood	25-year flood
Channel Changes*	50-year flood or the largest flood of record	25-year flood or the largest flood of record
Storm Sewers	10-year	10-year
Storm Sewers from Sags	50-year	25-year
Ditches, Gutters, and Inlets	10-year	10-year

* Note: Designs should be reviewed to ensure that backwater from 100-year flood or largest flood of record will not cause extensive property damage or result in the loss of a bridge. Further, bridges are to be designed to withstand a 500 year event, including scour.

For Local "A" and "B" roadways, the design should be reviewed to ensure that backwater from the 50-year flood or the largest flood of record will not cause extensive property damage, result in loss of a bridge, or inundate the highway.
